Commentary

Investors wary of uncontrollable government spending and zero interest rates are gravitating towards commodities like gold. The Fund is well-positioned to benefit from this trend. The Fund's high active share also positions it for further volatility from market structure weakness caused by passive investing.

The Frank Value Fund has nine times been awarded as a Wall Street Journal Category King in the Multi-cap Core and Mid-cap Core Categories.

Investment Objective

- Long-term capital appreciation

Investment Strategy

- The number-one focus of our strategy is: "do not lose money." We are conservative and strive to minimize the downside risks in our investments.
- We apply time-tested value investing principles to areas of the market other funds often overlook.
- Of the few companies that survive our model, even less pass our strict research. We insist on fiscal responsibility, excellent management, a quality business, and a reasonable valuation.

Fees

Class	Management Fee	Administration Fee	12b-1 Fee	Total Expense Ratio
Investor	0.99	0.25	0.25	1.49
Institutional	0.99	0.25	0.00	1.24
C	0.99	0.25	1.00	1.99

Investment Advantages

- Special Situations: We also apply our strategy to special situations such as spin-offs. Due to the complex nature of these transactions, we believe these companies are often mispriced and offer high potential returns.
- Large Universe / Benchmark Agnostic: We screen all profitable companies greater than \$100M market capitalization. This differentiates us from indices and other fund companies that benchmark.
- Concentration: We allow more flexibility in the Fund's position sizes for a strict focus on securities we believe to be the most attractive.
