The Frank Value Fund has nine times been awarded as a Wall Street Journal Category King in the Multi-cap Core and Mid-cap Core Categories.

## Investment Objective

- Long-term capital appreciation

## Investment Strategy

- The number-one focus of our strategy is: "do not lose money." We are conservative and strive to minimize the downside risks in our investments.
- We apply time-tested value investing principles to areas of the market other funds often overlook.
- Of the few companies that survive our model, even less pass our strict research. We insist on fiscal responsibility, excellent management, a quality business, and a cheap stock price.

## Fees

Management Fees	0.99%
Distribution/Service Fees	0.25%
<u>Admin Fees</u>	<u>0.25%</u>
Total Expense Ratio	1.49%

## Investment Advantages

- Special Situations: We also apply our strategy to special situations such as spin-offs. Due to the complex nature of these transactions, we believe these companies are often mispriced and offer high potential returns.
- Small Fund Size: The size of our Fund and lack of big company administration allows us to be agile and take advantage of value opportunities found in quality companies of all sizes. These companies may not be on the radar of larger money managers whose research is sometimes limited to those firms followed by traditional equity research providers.
- Concentration: We allow more flexibility in the Fund's position sizes for a strict focus on securities we believe to be the most attractive.
