### Commentary

The Frank Value Fund remains conservatively positioned as valuations on most US equities continue to offer poor long-term returns. Credit spreads widening amidst economic shutdowns are forcing markets to rapidly price in risk aversion and recession. From record valuations this is a drastic, painful process.

The Frank Value Fund has nine times been awarded as a Wall Street Journal Category King in the Multi-cap Core and Mid-cap Core Categories.

## Investment Objective

- Long-term capital appreciation

## Investment Strategy

- The number-one focus of our strategy is: "do not lose money." We are conservative and strive to minimize the downside risks in our investments.
- We apply time-tested value investing principles to areas of the market other funds often overlook.
- Of the few companies that survive our model, even less pass our strict research. We insist on fiscal responsibility, excellent management, a quality business, and a cheap stock price.

## Fees

Management Fees	0.99%
Distribution/Service Fees	0.25%
<u>Admin Fees</u>	<u>0.25%</u>
Total Expense Ratio	1.49%

## Investment Advantages

- Special Situations: We also apply our strategy to special situations such as spin-offs. Due to the complex nature of these transactions, we believe these companies are often mispriced and offer high potential returns.
- Large Universe / Benchmark Agnostic: We screen all profitable companies greater than \$100M market capitalization. This differentiates us from indices and other fund companies that benchmark.
- Concentration: We allow more flexibility in the Fund's position sizes for a strict focus on securities we believe to be the most attractive.
