Investment Objective

- Long-term capital appreciation

Investment Strategy

- The number-one focus of our strategy is: "do not lose money." We are conservative and aim to minimize permanent downside risk.
- We apply time-tested value investing principles to areas of the market other strategies overlook.
- Our investment process focuses on low absolute valuation, high quality business models, shareholder friendly management teams, and catalysts for unlocking value.

Investment Advantages

- Special Situations: We also apply our strategy to special situations such as spin-offs. Due to the complex nature of these transactions, we believe these companies are often mispriced and offer high potential returns.
- Benchmark Agnostic: We have the freedom to invest with high conviction without the constraints of benchmarking.
- Concentration: Our best ideas and nothing else. Fully invested the strategy owns 20-30 positions.
